

Proposal

Project :Service SOKAN MSR

Residential Building Management System for Egypt

Service SOKAN MSR is a residential building management system designed for apartment buildings in Egypt. It enables building administration, apartment onboarding through access codes with admin approval, tracking of global electricity and water meter readings, fair cost distribution per apartment, alerting for normal/emergency/consumption events, and generation of monthly PDF reports.

Tech stack

Frontend: Flutter

Backend / Database: Supabase, PostgreSQL

Offline support: SQLite cache
